

Multiple deflection for rope winch assisted felling

Double pulley as "loose pulley" on which 5 rope strands with 1.8to each act.
Triple pulley as "fixed pulley". This means that the winch is in the opposite direction to the fall direction of the tree.

Multiple deflection when pulling off hangers

Triple pulley as "loose pulley" on which 7 rope strands with 1.8 to each act.

The resulting force is 12.6 tons.

Another triple pulley as a "fixed pulley".
